

# Md Zahidul Islam

Fullstack web developer specialized in frontend design in web programming and testing. Skilled in pixel-perfect design with problem solving and experienced work with agile development environment

## EXPERIENCE

### **Prayers Connect Inc, Brooklyn New York — *Frontend engineer***

November 2021 - January 2023

- I led the charge in delivering pixel-perfect design and interactive functionality driven by API data and also ensuring their seamless integration with our backend system.
- I was responsible for writing and executing unit and functional test cases for our components
- I ensured its reliability and stability also maintaining versioning, ensuring our codebase organized and up-to-date

### **ExonHost, New DOSH Mohakhali Dhaka — *Frontend developer***

October 2020- October 2021

- I played a pivotal role in theme customization and the conversion of design assets from PSD and Figma. and driving innovation, and delivering exceptional user experiences.
- I worked closely with the design team to ensure seamless alignment between our frontend implementations and the design concept
